

DIDSBURY PIONEER

VOL. XXX, No 18

DIDSBURY, ALBERTA, THURSDAY MAY 4 1933

\$2.00 per Year. 5 cents a copy

Council Meeting.

The regular council meeting was held Monday evening, with Mayor Chambers in the chair. Councillors Spence, Pitt, Reiber, Keith and Fleury were present.

Rev. A. Traub appeared before the council, asking that a rebate be made on the taxes of the Bible School similar to that made in previous years. The matter was laid over for discussion at a future meeting.

Mr. C. R. Ford, secretary of the public library asked that the council make a grant towards the upkeep of the library. It was decided to make a grant of \$50.00.

The question of pedlars' licenses was discussed and it was pointed out that the Town Act only allowed towns to levy a license for control purposes and not for revenue. The license was set at \$2.00 per day or \$15.00 for the year.

Three applications for old age pension were dealt with. One of the applications was approved and the other two tabled for further information.

The work required of the scavenger came in for considerable discussion and it was decided that the scavenger be required to empty all cesspools in the town excepting for the hospital and hotel, at \$1.00 per load and that the account be payable to the town.

Mr. Roy McNaughton, eldest son of Mr. and Mrs. Alex McNaughton was quietly married to Miss Annie Morgan, of Eagle Hill at Calgary on Friday April 21st.

Mr. and Mrs. McNaughton will reside on the bridegroom's farm west of town.

Evening of Drama, Elocution and Music

An evening of drama, elocution and music will be given in the Opera House on Saturday May 6th by the Mount Royal Junior College, Calgary and the Community Players under the direction of Mrs. Helen B. Moller. M.A. Music will be provided by the Didsbury-Carstairs Orchestra, of 13 pieces.

Prices of admission: Adults 25c, and children 15c.

Programme

Didsbury-Carstairs Orchestra
Reading Anne Goulet
Reading Barbara Brown
Solo Marjorie Watkins
Facts "Sweet Revenge" 12 Minutes.
Characters taken by Children
Dance Jimmie Ward
Solo Marjorie Watkins
Comedy "Little Deeds of Kindness" 25 minutes
Dance Barbara Brown
Reading Jimmie Ward
Didsbury-Carstairs Orchestra
Comedy "Truth and Time" 35 minutes

The secretary of the Canadian Legion reports that damage has been done, presumably by boys, to the memorial and flagpole on the Butte. Stones have been thrown at the trench hats on the memorial and the ball on the flagpole has been used as a rifle target. Boys of the district will apparently have to be taught that such practices will not be tolerated, and any offenders caught doing such damage will be severely dealt with.

LOCAL & GENERAL

Football meeting Saturday night 8:30 Pioneer office. All interested please attend.

Miss Helen Campbell, of Calgary is relieving at the local telephone switchboard.

Miss Mollie Pearson, who has been practicing teaching at Spring-side school during the last week, returned to Normal School at Calgary on Sunday.

Mr. Floyd Wilcox, of Calgary Normal School was at the Jutland school April 24th to 28th, when he told Mr. Norman Bowles that he was very enthusiastic over the benefits of rural practice work.

The biggest thrill in one hundred years! "The Crime of the Century" at the Didsbury Opera House tonight (Thursday May 4th). The police couldn't solve this mystery, can you? Also comedy and added features.

J. Everett Birdsell is to be congratulated on attaining the 4th position in his class, that of 2nd-year agriculture, at the Olds School of Agriculture. He also won the special prize for judging livestock.

The monthly meeting of the W.C.T.U. will be held at the home of Mrs. Seemith on Thursday May 11th at 3 p.m. The topic, "Social Hygiene" will be given by Mrs. Berscht. You are cordially invited to attend.

Stop, look, and read it yourself! The C.E. League of Zion Evangelical Church is holding a tea and sale of home-cooking at the vacant store west of Hawkes Cash Grocery on Saturday May 13th. Bring your friends. Afternoon and evening.

At the regular meeting of the Canadian Legion held Saturday evening last it was decided to hold their annual field day and sports at the Butte on Wednesday June 14th. An outdoor play will be given and the usual sports for children, together with softball and other games.

Mr. and Mrs. M. Weber and Mrs. N. Bowles, who took advantage of the Easter excursion rates to the coast, returned home last weekend. They all report having had a splendid holiday and are enthusiastic over the idea of the C.P.R. establishing such cheap holiday rates.

Word has been received here of the death of Mr. Charles Fessenden, who passed away at Salem, Oregon on April 11th. Mr. Fessenden was one of the pioneer settlers, having homesteaded 10 1/2 miles northwest of here over 20 years ago. He still retained his land interests in this district. He is survived by his widow, who resides at Salem.

Fishing Season Opening.

Alberta's fishing enthusiasts are preparing for the opening of the fishing season on May 16th, when trout fishing will open in the North Saskatchewan and Red Deer rivers and their tributaries and in Cold Lake, and when fishing of perch, pickerel, pike and gold-eye will also open, being confined to waters where trout, grayling or Rocky Mountain whitefish are found.

Fishing for trout and grayling in the Athabasca and its tributaries and in the Bow River and its tributaries south to the international border, does not open till June 15th.

Residents of the province requiring permits only for those waters frequented by trout, grayling, or Rocky Mountain whitefish. The Fisheries division warns fishermen to become conversant with the regulations in every respect.

Didsbury Library.

Mr. C. R. Ford gave some interesting data to the council Monday evening.

There is only one other town in Alberta, with a population of under 1,500, that is supporting a public library.

That the library is being appreciated is evidenced by the fact that there are now 123 patrons against 53 a year ago, with an average of 2.0 books per week being taken out.

The regular library night is on Saturdays from 7 to 9, but demand for books was so great that Miss Bernice McGhee, librarian, is now opening the library on Wednesday evenings from 7 to 8.15, for which time she receives no remuneration.

There are now 1,025 books in the library and it is the intention of the board to add at least 75 new volumes in the near future.

The library is a free library and is supported entirely by grants. The town this year made a grant of \$50.00 and the Alberta government makes a grant of half the amount expended on new books.

Mr. C. R. Ford is secretary of the library board and great credit is due to him and the very efficient librarian Miss Bernice McGhee for the success the library is attaining.

Stiff Fines Imposed On Truck Owners

Constable Dablin, R.C.M.P., Olds makes a complaint on truck owners with Class B license hauling for other than their own produce. Several convictions have already been made and stiff fines imposed.

Softball Club Organizes for Season

The softball fans met at the office of C. E. Reiber on Friday night to organize for the season.

Prospects seem bright for a very successful season and it is expected to form a league with the various country teams and a series of games will be arranged as soon as seeding is over.

The secretary-treasurer's statement showed the club to be in a good financial condition, having a substantial balance in the bank.

The following officers were duly elected:

Hon. President, H. W. Chambers, President, J. V. Berscht, Vice-President, F. Kaufman, Sec.-Treas. C. E. Reiber. Membership committee: Messrs. A. Russell and J. W. Halton.

Grounds committee: Messrs W. Wynman, W. A. McFarquhar, R. Berscht and E. V. Woodcock.

The membership fee was set at the nominal charge of 25c, and all intending to play are asked to see the membership committee.

Seeding Progresses.

The good weather of the last ten days has seen great progress made in seeding throughout the district. The heavy moisture has delayed operations somewhat west of town and more seeding seems to have been accomplished east.

The first report having finished seeding wheat is Mr. J. Topley, who stated that he had 250 acres sown on Tuesday. He said that the soil is in splendid condition and that with continued good weather the grain should be as far ahead in his district as it was last year.

Bible Society Meeting.

A public meeting under the auspices of the Didsbury branch of the British and Foreign Bible Society will be held in Knox United Church on Wednesday May 10th at 8 p.m. The speaker of the evening will be Dr. Armour, of Toronto.

The united choirs of the Knox United and Evangelical churches will lead the singing and render the anthem, "The Radiant Morn." A quartette from the M.B.C. Church will also give a message in song.

A very hearty invitation is given to all to be present. Dr. Armour is one of the best known outstanding speakers in Eastern Canada.

Nature Cannot Be Defied.

It is recorded in Holy Writ that God created man and gave him dominion over all the earth, over the fish of the sea, the fowl of the air, over every living thing that moveth upon the earth; in a word, over every thing wherein there is life, including all fruit and seed bearing trees and plants. In his conquest and control of these things man has waged, and must continue to wage, a never-ending battle, and he has waged it, on the whole, successfully and with increasing efficiency as the years and centuries have come and gone.

Enforcing his dominion over every living thing, and as a means of exercising control over them and to secure for himself the maximum of benefits and comforts therefrom, man has gone further afield and assumed control over many of the forces of nature. He has overcome the obstacles of mountains by driving tunnels through them; he has bridged great streams and gorges; he has dammed mighty rivers to obtain power; he has deised into the bowels of the earth for fuel and minerals to serve him; through his inventive genius he has overcome the handicaps of distance and space, finding both the sea and the air serve his purposes.

Still not content, man has attempted to control other laws of nature over which he was not given control and which, despite all his efforts, are and ever will be beyond his control. As a result of jealousies and rivalries developing as mankind increased in numbers, men quarrelled and fought among themselves. They divided into tribes, and later into nations, developing distinct national traits of character and ambitions, each selfishly endeavoring to secure to itself a larger measure of control over the earth than that enjoyed by their rivals, and constantly warring with each other to obtain and retain such control.

The world was created for man—the whole world for the whole race of man. Its climate was varied, and with variations in climate there is variation in products and methods of living, each part having something to contribute to the welfare of man in other parts, and all going to make up a completed whole. But man developed narrow tribal and nationalistic instincts and ambitions, lived himself off in groups into compartments, and sought to live unto himself, self-satisfied and self-contained, apart from the rest of the world. Such a mode of living might succeed for a time, but man was simply punishing himself, denying himself many of the benefits and comforts which an untrammelled nature intended he should possess and enjoy. The whole race of mankind is now paying the penalty for that great error.

This primary error led to many others, and man set his ingenuity to work to overcome the difficulties he had himself created. Having defied one great law of nature he thought to correct that mistake by defying other laws. He conceived the mistaken idea that he could, by the mere enactment of his own man-made laws, substitute artificial political boundaries for the natural boundaries as defined by geographical facts. He had changed the course of rivers, which could be not change the streams of man's intercourse, communication and trade with each other? Why could he not change great areas of the world's surface intended by nature for agricultural pursuits into great manufacturing centres? Where nature designed that communication and trade should flow north and south, with one section the complement to the other, why should man make it otherwise and force communication and trade to flow east and west in order that it might be confined within certain narrow political divisions set up by himself in defiance of nature's laws?

Man thought he could do it, and he proceeded to try, with the result that the whole race of man is today mired in a morass of its own making. All men and all nations are floundering with no solid ground under their feet. In their difficulties and desperation they still blindly rely upon the enactment of one man-made policy after another, each a further defiance of nature's immutable laws, to get them out of their trouble, instead of frankly acknowledging the initial mistake, wiping out their narrow nationalistic policies, and allowing the laws of nature to operate freely without restriction or attempted control by man, who, after all, cannot control them.

Man was not created to be so ordered and controlled. He was given a body, a mind, a soul of his own. He was to have dominion over all things, even a State created by himself, to have complete dominion over him. It has been tried before in this old world's history and it failed, as it always will. It is being tried again today under Fascism in Italy and Germany, under communist socialism in Russia, under other forms of despotic government in so-called less enlightened countries. It may abide for a time, but it will still fail sooner or later. And it will fail because man is an individual, with a mind and soul of his own. His initiative will not be denied. Man will eventually get back to recognition and observance of nature's unchangeable laws. Then, and then only, will he again achieve happiness and contentment.

Scottish At Grain Show

Scottish Entry For Grain Exhibition At Regina

An entry of high quality oats, from a farm owned by same family for over 60 years, will be a challenge to the oat farmers of Saskatchewan at the forthcoming World's Grain Exhibition at Regina.

Officials of the exhibition announced that an entry has been received from Mrs. Maggie Eccles, of High Pinmore, Maybale, Ayrshire, the sample being registered in the oat section.

Mrs. Eccles operates a 250-acre farm close to the birth place of Robert Burns, the poet, and the farm has been in the same family for over 60 years, special attention being paid to oat production.

A long list of exhibition successes over a number of years is Mrs. Eccles' record. In 1931 she won the gold medal for grain at the national stock and grain show at Edinburgh.

Sugar Elevators

Raymond The First Place In Canada To Adopt This Plan

Sugar from this famous sugar beet growing country will be stored in elevators in the same manner grain is stored. Raymond, Alberta, is the first place in Canada to take such a step.

The Canadian Sugar Factories, Ltd., announced that they would build four elevators at a cost of \$50,000 for the purpose of storing the sugar produced in the Raymond area. Each elevator will be 30 feet in diameter and 125 feet high.

Britain Rich In Minerals

Practically Every Known Metal Is Found In Empire

The news that the vast bends of iron ore in Northamptonshire are to be worked on a great scale calls to mind the fact that Britain is still one of the richest metal-bearing countries in the world. This remains true despite the fact that during the past half-century, the total value of minerals raised in Great Britain was about three thousand five hundred millions of pounds. Of this, coal represents about two-thirds; the rest comprises nearly every metal or mineral in common use and a number of the rarer ones. Cornwall and Devon still produce tin. Immense quantities of rich tin ore lie below the surface, but so far below it that to extract the mines cannot compete successfully with the shallow tin dredgers of Malaya and the open workings of Bolivia. Cornwall, too, has copper, antimony and arsenic, to say nothing of radium. There is a reef of gold-bearing rock under the Forest of Dean which contains enough gold to pay Britain's national debt. Under present conditions, however, it does not pay to work it.

Worthy Of Consideration

Banning Jazz From Radio Broadcasting Is Good Idea

Chancellor Hitler has banned jazz music from the Berlin broadcasting station on the ground that it is not a cultural factor.

The idea is worthy of consideration elsewhere than in Berlin. The childish tum-tum of the jazz orchestra, its senseless dissonance, its blaring and blasting and blattney, combined with its horrors of cacophony that are enough to make all dead composers of melody turn in their graves, stamp it as a production of the lower orders of human intelligence.

Jazz has enjoyed a long—a far too long—life as a popular craze on this continent and in Europe. But from all quarters reports have been pouring in for a year or so to the effect that its popularity is on the wane; and there is ample evidence that this is the case. Such a patent proof of a return to cultural ideals is welcome on many grounds, but on none more vitally than that it presages the shattering of the house of one of the most insane, discordant and inartistic forms of noise yet conceived by humanity.—Montreal Star.

"THESE HARD TIMES"

"The hard times and scarcity of money makes it more important than ever to economize. One way I save on clothes by converting the color of faded or out-of-style dresses, coats, stockings, and underwear. For dyeing, I use Diamond Dyes. They are the most economical ones by far because they never fail to produce results that make you proud. Why things look 'better' than new when redyed with Diamond Dyes. They never spot, or run, or turn. They go on smoothly and evenly, when in the hands of even a ten year old child. Another thing, Diamond Dyes never take the life out of cloth or leave it limp as some dyes do. They deserve to be called the world's finest dyes!"

S.E.G., Quebec.

Favor Sterilization Plan

Stand Taken By Lieutenant-Governor Of Ontario Is Commended

The Toronto Local Council of Women and several clergymen joined in expressing appreciation of the stand on behalf of sterilization of the mentally unfit taken by Dr. Herbert A. Bruce, Lieutenant-Governor of Ontario.

On recommendation of Mrs. R. G. Smythe, mental hygiene convener, the local council of women wrote Dr. Bruce acclaiming his stand. Mrs. Smythe said what the province wanted was permissive and selective sterilization of the mentally unfit.

Rev. Canon Lawrence Skey, Anglican, said there were "two or three thousand feeble-minded children in Toronto. We are all behind the Lieutenant-Governor and are proud that he has had the courage to speak his mind for the welfare of the people."

More than 8,200 applications for patents were filed in Czechoslovakia last year.

To Roll and What to Roll...

That is the question . . . until you discover how easily you can roll a more enjoyable cigarette with Ogden's Fine Cut Cigarette Tobacco.

Easy rolling! Yes, but that's only half the story. Wait 'till you light up! Then you'll know why Ogden's Fine Cut has become first choice with so many men who roll their own.

Ogden's Fine Cut is a real cigarette tobacco . . . the kind that rolls on its merits. No need to take our word for it. Just try a package . . . use "Chantelec" cigarette papers with it.

OGDEN'S FINE CUT

Your pipe knows Ogden's Cut Plug

Good Ads Always Pay

Give Their Daily Message To the

Buying Public
"Good advertising will sell goods even in bad times," says Louis Tanenbaum, production manager of R. H. Macy & Co., the famous department store of New York. The Macy executive have proved it to their own satisfaction. In their recent anniversary sale they found that well planned advertising brought crowds to the big store.

Experienced executives of successful stores know that "good ads always pay." That is why they keep hammering away, telling their message to the people day after day.

For Creamed SOUPS and SAUCES

If you have not tried St. Charles Milk you will be surprised at the improved flavor it gives to cream soups and sauces. It is handy and economical too and with it you can make hundreds of tasty dishes that you and your family will enjoy.

Always ask for St. Charles by name and then you can be certain that you are obtaining the finest evaporated milk.

Jasper National Park, Great Alberta Reserve, Is Outstanding Game Sanctuary

Jasper National Park in Alberta, Canada, is today one of the greatest wild life sanctuaries in the world. Here, in an area of 4,200 square miles, many species of wild life live free from human molestation. At the time white men first entered this region, a little over a century ago, big game was plentiful. Bighorn sheep and Rocky Mountain goat fed on the hillsides, deer and elk ranged the valleys, and the flats a few miles south of the present Jasper townsite were frequented by buffalo. The whole country was a rich hunting ground for both white men and Indians.

When Jasper National Park was set aside in 1907, by the Government of Canada to meet the recreational requirements of the people and to serve as a refuge for the native game, great herds had been made in the wild life by hunters. As a result of the establishment of sanctuary conditions the preservation of the different species of wild life indigenous to that region has been assured, and now hunters may feel confident of having an unfailing supply of game in districts adjacent to the park.

One of the chief attractions to visitors at the present time is the variety of wild life which may be seen along the motor highways and trails in the park. Bear, moose, deer, bighorn sheep and mountain goat may frequently be seen from a car, while caribou may generally be sighted in the high open passes of some of the nearby mountains.

In recent years there has been a remarkable increase in the wild life of the park. It is estimated that the number of bighorn sheep has doubled within the past few years in the Athabasca Valley. They are especially numerous at Pochontas, Interlaken, Brazeau River, Snake Indian Valley, Moose Horn Creek, and Southfork River. Rocky Mountain goat are numerous and are spreading to new ranges in the park. The largest herds of these animals are to be found at Shale Banks, Smoky River, Colin Range, Maligne Lake, Whistler Mountain and Circus Valley. Elk, moose, deer and caribou are seen in large numbers throughout the park. The elk, which had so nearly been exterminated a few years ago, have increased to such an extent that now they are extending their range in many directions. Reports state that they have been seen as far west as McBride, British Columbia, on the Canadian National Railways, which is one hundred miles west of the park. Moose are also increasing in numbers, especially in the northern part of the park, which is heavily timbered and well suited to the needs of this animal. Deer in the park are rapidly increasing in numbers. Caribou are spreading throughout the park and overflying from the Smoky River area into British Columbia, as far south as the Canadian National Railways line. The main herds are about Bang Pass, Twin Tree Lake, Tongpin and Circus Valleys, Smoky River, Brazeau Valley, Upper Smaring River, Dominion Creek and Mito Valley.

There has been a large increase in the number of bears, especially in the immediate vicinity of Jasper. There are many beaver colonies in the park and the animals are increasing rapidly in numbers. The beaver constitute one of the numerous attractions at Lac Beauvert, where visitors in the evening hours catch glimpses of them in their home waters.

Millions Have Defective Hearing
There are approximately 3,000,000 people in Great Britain with defective hearing in one or both ears. This statement appears in a survey of two years' research by the National Institute for the Deaf and the Department of Industrial Physiology of the London School of Hygiene, published in the British Medical Journal.

An impacting machine developed in University of Toronto laboratories is claimed to greatly aid germinating of clover seeds through its action in breaking or weakening their hard shells.

W. N. U. 1930

Zoo Loses Ancient Tortoise

The Ends Career Of 150-Year-Old Reptile

London papers record the death from influenza of Sopa, the giant female tortoise at the Zoo. There is no doubt that her registered age, one hundred and fifty, is correct; there had been carved upon her undershell the year of the Peace of Versailles, 1785. This three-hundredweight reptile had been ill for some weeks. Recently pneumonia developed, and has now claimed her at her prime. The animal was a native of Galapagos Islands, off the coast of Ecuador.

In spite of her death, Sopa will continue to be an object of interest, since she is to be mounted for exhibition purposes in the galleries of the Natural History Museum at South Kensington.

By Ruth Rogers

**TAUNTY SMARTNESS IN COAT-
DRESS WITH A NEW BROAD-
ENED SHOULDER LINE**

It's the sort of stunning little dress you can wear and wear, and feel smart in.

It slips easily under a coat and is as smart as paint without one when the warm Spring days arrive.

You'll have guessed that the original was in beige rough crepe with quite daring white crepe for the collar, button and tie detail.

It may blue crepe is your choice, its just as snappy with cord-reef trim.

Grey checked woollen weave is chic, with plain toning grey crinkly crepe silk collar and worn with a wide grey leather belt.

Style No. 558 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Size 16 requires 3 1/2 yards 54-inch, with 1/2 yard 38-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Eskimos Drink Alcohol

Civilization Haunting Natives Of Victoria Island

"Civilization" is haunting the Eskimos of Victoria Island. They have taken, to drinking denatured alcohol, according to the report of Corporal Wall of the Royal Canadian Mounted Police.

In paying into tribal calls, this potent and methylenedrine are among the appetites passed around. The corporal fears if the practice continues it will seriously endanger the health of the natives.

Some redeeming features are noted, however. The influence of the mis-stimulants is strengthening, and the Eskimo pride themselves not only in their hymn-books, but in their ability to sing these hymns.

"They observe Sunday very closely and will not do a thing, spending most of the day singing hymns, even if the camp is out of meat."

Humanitarian influences are now being borne in on the natives. Corporal Wall noted the average of the Eskimos families was three children, of whom there were as many girls as boys. The practice of letting the girl babies die in infancy is dying out, he says.

Has Ancient Lineage

Greyhound Probably Oldest Of Dog Family In World

The greyhound on board of a very ancient lineage and is probably the oldest of the dog family in the world. It figures on Egyptian frescoes of the early Pharaohs, and was used for coursing by Greeks. A fine Antique sculpture in the British Museum of two greyhounds proves that they were appreciated by the Romans. Greyhounds were favorites with almost all English kings, from Canute to Charles the First, and King John repeatedly took greyhounds instead of money for payment of the penalties he inflicted. Until modern times the greyhound was an aristocratic dog which only "gentlemen" freeholders were permitted to keep. A trace of this regulation can be found in the fact that in England until 1853 a special tax of twenty-two shillings each was levied on greyhounds to place them beyond the reach of all except the favored few.

Notice Aailed Nothing

Idea Of English Vicer Did Not Save His Apples

A vicer who had a nice orchard attached to his vicarage was rather perturbed when he learned that soldiers were coming to camp in the field close by. He put a card against one of the trees with the inscription:

"Please do not touch the apples. We want them for the Harvest Festival."

The soldiers arrived, and the next day when he went to the orchard he found that all the fruit had been stripped from the trees. The card had been recovered, and the following inscription found for what he had written:

"All is safely gathered in, ere the winter storms begin."

BRITAIN LAUNCHES THE "STARFISH"

Our picture shows the launching of the new British submarine "Starfish," sister ship of the "Seahorse," which were ordered in March, 1931. The "Starfish" and "Seahorse" were designed by A. W. Jones, C.B., C.B.E., the Director of Naval Construction. There are four vessels of this class and they are 187 feet long, 24 feet beam, with a standard displacement of 640 tons.

Work of Canadian Plant Breeders In Improving Quality of Wheat An Epic of Scientific Achievement

Dentists In Olden Times

Artificial Teeth Were Familiar In Time Of Caesars

Dentists played an important role in the ancient civilizations of Egypt, Assyria and Peru, according to Dr. Leroy M. S. Miner, dean of the Harvard Dental School.

Excavations among the Incas, remnants in Peru, Dean Miner said, revealed that the teeth of the Incas were ornamented with thin gold discs. In Ecuador, teeth were almost entirely covered by an covering of gold. In ancient Mexico and India, they were commonly adorned with turquoise and other precious stones.

In an Egyptian document nearly 3,000 years old, archaeologists found remedies for toothache and for tightening loose teeth, and in the ruins of Nineveh was found a clay tablet, 2,500 years old, in which a court physician recorded his diagnosis of a royal toothache.

"By the time of the Caesars," declared Dean Miner, "artificial teeth were familiar. The Roman poet Juvenal was complaining with an earnest eye the efforts of the beauties of the day to maintain their charms and remarks that 'the belle lays down her teeth at night just as she does her slippers'."

"In another place he unkindly remarks that 'she now has removable teeth and would have removable eyes if they were for sale.'"

Women Have Pet Aversions

But Dislike Of Fur Usually Varies With Individual

Every housewife has a pet aversion among her duties. This hated job varies with the individual. Such were conclusions of the members of the Women's Institute of Burton, England, which has just completed a survey on housekeeping. The president was positive about her aversion. It was getting up in the morning. Other dislikes were cleaning windows, spring cleaning, chopping wood, washing up, washing one's hair, darning, patching, cooking, cleaning boots and shoes and tidying grates. Three agreed that darning tubs was the worst. Two others said it was cleaning chickens. Another disliked keeping meals waiting, and an old lady declared that she "detested everything."

A Northern Outpost Of Agriculture

Agriculture is being successfully carried on 165 miles northwest of Prince Albert at Beauville, Sask., on the Beaver River. At that point there is a well-equipped farm producing cereals, vegetables, hay and tobacco for the use of the local mission. The locality is shown on the De-la-Croix map sheet issued by the Topographical Survey, Department of the Interior, Ottawa.

The Contributions Made by Canadian Plant Breeders in the Form of Superior Varieties of Field Crops Stand Almost as an Epic in the Realm of Scientific Achievement," stated L. H. Newman, Dominion Cerealist for the Canadian Government, Experimental Farms, in a recent address broadcast over a chain of Canadian radio stations.

"These contributions," he continued, "reveal a story of nearly half a century of determined effort, replete with discouragement and disappointment but ultimately rewarded with enormous gains."

"The most important plant-breeding contribution made thus far in Canada has been in connection with the development of varieties of wheat capable of thriving under conditions which characterize much of the great wheat-growing plains of Western Canada."

"While the creation of an early-ripening, high-yielding variety of wheat of good quality has been a major objective of the Canadian plant breeder for many years, more recently he has been grappling with another problem of equal if not even greater importance. This consists in an attempt to combine in one variety the yielding ability and baking quality of such varieties as Marquis with the ability possessed by certain non-browning wheats to resist the attack of that dread enemy of the wheat grower, the disease known as wheat rust. This work, which is centered largely at the Canadian Government Rust Research Laboratory at Winnipeg, seems to be progressing rapidly toward the desired goal. It is confidently expected that within the next two or three years the momentous announcement will be made that a new rust-resistant wheat of high quality and good yielding ability is available for propagation by farmers in the affected districts."

A Record High Tide

Damaged Old Fortress That Resisted Wolfe's English Invasion

The rock-built old fortress that stubbornly resisted Wolfe's English invasion has fallen before the onslaught of a storm that drove huge seas into Louisbourg's sheltered harbor, in Nova Scotia.

A record high tide breached a gravel barrier for the first time in 177 years and flooded a large part of the ancient fortification, laying bare the base of the famous French hospital in the fortress grounds. The approach roadway to the west gate of the fort was practically ruined, and it is expected that restoration work on the remainder of the fort will have to be halted this year to allow it to be repaired.

The last recorded occurrence of the kind took place in 1756—two years before Wolfe took Louisbourg—and caused the French authorities much trouble. Sentries had to be withdrawn because the water rose up to their waists.

Not Much Of A Success

Airplane Wedding Was Found Too Nasty For Comfort

Marriage in an airplane may be a novelty, but it is not romantic, according to Mr. and Mrs. James Cause, macker, who were wed high above Sydney, N.S.W. The bride and groom took off from the aerodrome prepared to have their wedding broadcast to the world. The plan to switch off the airplane engines during the ceremony was found impracticable. Rev. H. Mills, of the Dulwich Hill Congregational Church, had to shout the bride and groom had to shout their "I wills," and the radio announcer almost shouted himself hoarse. The couple had to grasp the rack above their heads several times to avoid being thrown out of the swaying plane during the ceremony. When the party reached the ground, Rev. Mills said he had had enough of airplane weddings, the motion picture operator replied that the Registrar General had stopped the filming of the tele, and radio listeners complained that they had heard nothing.

Taxation, Then and Now

According to a London journalist,
the modern taxpayer has something to
be thankful for. We are better
off in some ways in the matter of
taxes than they were a hundred or
two hundred years ago in Europe.
In 1695, for instance, there were
taxes on bachelors, on widowers and
those about to marry. The younger
Pitt taxed hats, candles, hearths,
windows, watches, hair-powder,
female servants, horses, christenings,
deaths, births and burials. The
bricked-up windows in many old
houses in London show how house-
holders evaded the window tax.
Similarly, the introduction of a tax
on hair-powder led to the introduc-
tion of short hair. Cromwell went
so far as to tax plum-puddings.
The Mansion House was built by
money collected from persons who
refused to act as sheriffs, then an
unenviable job.

Until eighty years ago there were
heavy taxes on newspapers and
advertisements. Every advertise-
ment in France today is taxed. It
was Robert Peel who introduced
income tax—at 7d. in the pound.
Bachelors are taxed today in France,
Germany, Italy and Yugoslavia. In
France unmarried women of over
thirty are also taxed.

The Municipal World.

Alberta News Letter.

Seed Grain Clubs.

Organization of seed grain clubs
in Alberta for 1933 reveals a large
increase in the total organized in
1932, or in any year since the work
commenced. While organization is
not yet complete, there will be about
100 seed grain clubs, with about
1,400 members, as compared to 703
clubs and 1,000 members in 1932.
Of these there will be 42 wheat clubs,
with membership at 650, including
11 Reward Wheat and 31 Marquis
Wheat. Oats clubs will total 28,
with membership at 200. Barley
clubs will total 7, with 100 members,
and there will be three or four corn
and potato clubs with about 50
members.

New Homestead Lands.

About 200 townships of land in
Alberta, ranging from the Calgary
district in the south to the Fort
Vermilion district in the north, which
has previously been closed to settle-
ment, was opened for homestead
entry Tuesday. Over 2,000,000
acres of land will be available, ac-
cording to officials of the provincial
lands and mines department. The
surveyed lands not open to general
settlement will be available to entry
by settlers residing within 9 miles
entry in all cases being subject to
the provisions of the Provincial
Lands Act as to residence in the province.

Pest Competitions.

The annual competition for des-
truction of agricultural pests is once
more announced by the provincial
game branch. These cover destruc-
tion of crows, magpies and gophers.

Train Time at Didsbury

The summer schedule on the C.P.R.
went into effect Sunday, with only
minor changes to the trains on the
C. & E. branch. The schedule of
train times from Didsbury remains
the same and slight change has been
made to the night schedule. The
train going north now leaves at 2:55
a.m. in place of 2:49, while the
southbound leaves at 4:48 a.m.
instead of 4:50.

The following is the schedule:

NORTHBOUND
2:55 a.m. daily
10:13 a.m. daily except Sunday
6:41 p.m. daily
12:51 p.m. mixed daily
SOUTHBOUND
4:50 a.m. daily
12:51 p.m. daily except Sunday
5:54 p.m. daily
11:02 a.m. mixed daily

Nothing to wear but Food.

A town guy said to a farmer:
"You ought to be getting along
allright. You have your own milk,
butter, eggs, meat and vegetables.
You have enough to eat and a place
to sleep. That's a lot in a depression
like this."

"Uh, huh," assented the farmer,
"but you come around eight or nine
months from now and you'll see the
fattest, sleekest, nakedest farmer
you ever beheld."

Howl, Wolves, HOWL

studied the Ojibway Indians to
produce a riverside version of
"Howlath".

A survey of the Wolf Week pro-
gramme reveals a combination of
sentiment and excitement. Gov-
ernor Roosevelt of New York
State has presented the Ottawa
with a British flag taken by the
U. S. troops when they burned the
Sault in 1811. The flag will be
hoisted with appropriate cere-
monies. The excitement comes
in when the visitors will be invited
to amuse themselves running
the Sault Rapids in canoes, at-
tending Algonia Wolf Club din-
ners, and sympathizing with the
unlucky winner of a bear, which
animal, Jim Curran promises to
rifle in lieu of one of his beloved
wolves. The Algonia Self-
Defence Club has added three
pleasant features to the pro-
gramme. The members of this
club never deny themselves any-
thing, and they advise that there
are no peevish cops in the Sault;
that their city is only an over-
sight ride from Toronto on the
Canadian Pacific's homeliest train,
and that they still serve cheese
with the apple pie in the Sault,
which Jim Curran says is built
inside Lake Superior in the great
Algonia forest, near the timber
wolves.

Jim Curran, Editor of the Sault
Daily Star, believes with old
Sam Martin that "a man who
says he has been et by a wolf is
a liar".
Jim Curran, as all the world
knows, is an expert on wolves, as
such an expert that he has per-
muted Sault Star. He holds a
Wolf Week, July 25-26. That is
the kind of a week it's going to
be. Jim Curran, the wolf expert,
says it will be worth attending
that the Sault is the friendliest

place in Canada and that reput-
able strangers will be welcome.
Plus hats will not be practical
headgear during Wolf Week at the
Sault. This is a warning, and is
understandable at a show where
the background is totally com-
posed of timber wolf. The Ojibway
Barbecues, Indians and whores.
Jim Curran and his fellow-wolf
fans of the friendliest town have
cornered the world's best profes-
sional long distance wolfers for
some real racing, and have per-

Installs New Cooling System

Mr. Tom Morris informs us that the Didsbury Dairy has installed a new cooling system for milk and cream. The system provides for a continuous stream of water pumped straight from the well to the cooling tanks. The system is the same as that used by the up-to-date city dairies and keeps the tanks at an even temperature of 40 degrees.

Mr. Morris stated that he is leaving nothing undone to improve the quality of his products.

Cheap Fares Produce Traffic

The decision of the railway companies to establish extremely low Easter rates from all points in the prairie provinces to the Pacific coast was amply justified by the results. Over 2,300 persons took advantage of the favorable opportunity to travel by way of the Canadian Pacific route, while a fairly large number journeyed over the Canadian National.

It is obvious that the great portion of this Easter travel was inspired by the cheap rate. The success of the venture must have convinced the railway managements that people are keen to travel if the pleasure is within reach of their pocketbooks.

More Than Half Canadian People Under 25 Years

More than half of the people of Canada are under the age of 25 years. They numbered 5,334,991 at the census, and those who were 25 or over totalled 5,144,795. The population was 10,379,786.

There were more persons of the age of 10 years than any other age. The 10-year-olds numbered 232,180 and the babies of less than 1-year 202,389. The 20-year-olds were 189,389 and the 25's 165,992.

Continues Probe Of State Medicine

Investigations of a plan of state medicine will be continued by the special committee of the legislature which presented an interim report at the recent session of the legislature. The committee, under the chairmanship of the Hon. George Howley, represents all groups in the house.

WEEKLY JOKE

To make sure the youngster was not disobeying the bass fishing law, the fish warden took his string of fish out of the water and found only catfish, perch and suckers on the line. A few feet farther down the stream he found a large black bass wiggling on a string weighted down with a stone, and asked the boy what he was doing with that fish.

"Well, you see," answered the boy, "he's been taking my bait all morning and so I just tied him up there till I got through fishing."

Favorable development of this year's crop on the prairie provinces is noted by the Canadian Pacific Railway's weekly report issued recently by the Agricultural Department in Winnipeg. Most of the wheat in Manitoba and Eastern Saskatchewan is headed at an average height of two feet, and elsewhere ranges between advanced cut blade to headed stage. Hay loss has been only local and in scattered districts.

Bob Davis, roving columnist of the New York Sun, and probably the most travelled newspaperman in the world, has been staying at the Banff Springs Hotel on his way back from Hawaii, accompanied by Mrs. Davis. Mr. Davis has a flair for the unusual, and will likely unearth a wealth of good material for his column among the old timers of the Rockies.

Taxation comparisons in connection with motor vehicles and railroads should take into consideration that the railways pay for their own roadway, and also to some extent for the roadway used by their motor vehicle commuters, says the "Traffic World". This brings in the question of how much the motor vehicles should pay for the highways and whether they are doing it.

Here and There

Another sale of salmon anadromous is announced in New Brunswick for the famous waters of the high river which will be leased to the highest bidder at a sale to be held in Fredericton, April 27. The lease will be for ten years from March 1, 1933.

Canadian railway salaries have experienced severe cuts over the past few years. This has applied to officers as well as to workers on the trains and along the lines. The recently issued annual report of the C. P. R. announced that E. W. Bostry, Chairman and President of the C. P. R., had instituted a special cut of 13 per cent, for himself and the Company's directors. This makes a total cut of 25% for them since the decline in earnings began.

Nelson River's famous speckled trout don't know it yet but the place has gone forth that non-residents shall pay only \$5.00 for an annual fishing license, or about half the charge hitherto. Further, Nelson guides will offer their services this year for \$25.00 a week as against \$25.00 in 1932. Since most of the Nelson ponds and in those off the islands at its mouth including St. Ismaire, run to seven pounds and up.

Canadian Pacific liner Empress of Japan recently broke up a speed record when she travelled the 2,329 miles from Honolulu to Victoria in four days, eight hours and three minutes, clipping seven hours, 47 minutes from her best previous time for the voyage and much outdistancing the best mark for any other Pacific liner except the Empress of Canada.

The literary hit of the year has been made by Frederic Nivon, Canadian author, living near Nelson, B.C., whose "Miss Barry" has been recently hailed by authorities as one of the most profoundly having books ever written. Mr. Nivon, who thus breaks into the ranks of best sellers, earlier in the century handled baggage and freight for the Canadian Pacific Railway at Nelson.

H. F. Mathews, general manager, Canadian Pacific hotels in western Canada, with headquarters at Winnipeg, has been promoted general manager of the company's hotel system from coast to coast, with headquarters in Montreal, according to a recent announcement by E. M. Petty, chairman and president of the railway.

It is necessary to go back to the year 1916 to find revenues of the Canadian railways on a level comparable with 1932. The following figures show that in 1932 as compared with 1916:

Railway Operating Revenues	Increased 5.5%
Railway Operating Expenses	Increased 20.9%
Net Revenue from Railway Operations	Decreased 50.6%
Railway Tax	Increased 135.7%
Net Income	Decreased 58.3%
Railway Property Investment	Increased 34.6%
Rate of Return on Investment	Decreased 69.0%
Revenue Freight Tonn Miles	Decreased 28.3%
Revenue Passenger Miles	Decreased 50.3%
Actual Gross Tonn Miles	Decreased 17.2%
Payroll of Engine and Train Service Employees and Telegraphers	Increased 31.3%
Tonn Miles	Decreased 22.8%

WORLD HAPPENINGS BRIEFLY TOLD

Mme. Blanche Doumer, widow of the late assassinated president of France, died April 4.

Mount Everest, highest mountain in the world, was crossed by aeroplane April 3, for the first time in history.

More than 1,000 men are expected to enter the Cranbrook area this summer in one of the greatest gold rushes this district has witnessed.

Kilkenny, Irish Free State, is erecting municipal houses to be rented to working people at \$1 a week including taxes.

President Roosevelt has ordered reductions in United States veterans' allowances, totalling approximately \$400,000,000. The reduced rates are effective July 1.

Twenty-five thousand dollars in gold pieces and \$1,500 in currency were found by police today in searching the house of Mrs. Josephine Schwab, 76-year-old recluse who died suddenly of heart disease in Detroit.

Mayors of Fort William and Port Arthur were in Winnipeg recently to discuss with a committee of the Winnipeg Grain Exchange the proposal to move the exchange and its facilities to the head of the lakes.

Communist activity in Canada is more dangerous and acute today than for many years. Hon. Hugh Guthrie, Minister of Justice, told the House of Commons, and it might be necessary to increase the force of the Royal Canadian Mounted Police.

Yusuke Matsukata, Japanese statesman on his way home from Geneva following his country's withdrawal from the League of Nations, said in his opinion United States and Europe could help speed the return of peace to Japan and China by refraining from further interference.

New Creamery Opened

Many Lending (Ottawa Attend Ceremonies At Prince George, B.C.)

A large gathering of leading citizens recently attended the opening ceremonies in connection with the inauguration of the Interior Creamery at Prince George in the northern central interior of British Columbia. After inspecting the machinery and the milk handling equipment and listening to discussions on modern sanitary milk hygiene, the gathering was addressed by prominent officials.

French Guinea and Dakar, in Senegal, are to be connected by an Atlantic cable, 2,400 miles long.

SASKATCHEWAN JUNIOR GRAIN JUDGES

One girl and three young men were selected to represent Saskatchewan in the junior grain judging contest at the World's Grain Show from this group who took part in the final elimination contest at the University of Saskatchewan. Reading from left to right in the row are William S. Hovvick of Maple Creek, Edgar Lake of Turtleford, John McKay of Coan, Leonard Weber of Vawn, and in the front row, Roy C. Mathison of Bount, David Clark of Incheith, Isabel Hutchison of Regina, Mabel Anderson of Regina, and James H. Bridge, instructor.

Highest points were secured by Isabel Hutchison, Regina; W. S. Hawrylak, D. Clark and R. Mathison. These four will receive further instructions at the University of Saskatchewan and three of them will represent Saskatchewan in a contest that will include teams from all the Canadian provinces and many of the states to the south.

By Ruth Rogers

DASHING SCHOOL GIRL DRESS IN SIMPLE SPORTS TYPE

It's very simple as it should be for youth.

It carries a sporty air in its buttoned closing from neck to waistline. Its capped sleeves are another smart feature.

Still another asset is that it is easily fashioned.

For it, linen in sailor-blue is exceedingly attractive with white trim and buttons, carrying out the nautical idea, now so popular.

Angora weave woolen in a yellow and brown checked pattern is another smart scheme with yellow trim.

Style No. 597 is designed in sizes 8, 10, 12 and 14 years.

Size 8 requires 2 1/2 yards 35-inch, with 1 1/4 yards 5 1/4-inch band.

For warm weather wear, you can melt the long sleeves as seen in the miniature view.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap cut carefully.

TOWNE

Canada's First Wood-Pulp Mills.
The year 1860 marks the beginning of the manufacture of wood-pulp in Canada. In that year the first groundwood, or mechanical pulp, mill was built at Valleyfield, Quebec, and the first chemical pulp mill at Windsor Mills, Quebec.

Farthest North Golf Course

Ten Polar Bear Teeth Is Membership Fee

The ancient game of golf is played in all parts of Canada, even in the Arctic Circle. What is probably the world's farthest north golf links is located at Chesterfield Inlet on the northern shore of Hudson Bay in latitude 67. Also it might be called the most exclusive of all golf clubs as it has a membership of only four—the Church of England missionary, the Roman Catholic missionary, the Hudson's Bay Company's Factor and his assistant. The membership fee, which entitles the payee to life membership, is ten polar bear teeth. The course is still in process of building so far three holes being completed. They are 400 yards, 250 yards, and 350 yards respectively in length, and are played three times in succession. Par for nine holes is 36.

While the tundra moss was suitable for the fashioning of an excellent fairway, the construction of greens presented some difficulty as grass will not grow so far north. This problem was solved, however, by building the greens from hand-picked beach sand of which there is an expanse of ten miles near the course. Four Eskimo boys, one for each member, form a regular roster of caddies.

Labor Shortage In Palestine

Leisured Classes Are Asked To Do Manual Work

Palestine, the one country in the world where there is no unemployment and where there is actually a shortage of labor, is depicted by Miss May Bere, just returned to Montreal from the promised land, to tell the Canadian Women's Hadassah of progress in Jewry's homeland.

Miss Bere, a former psychologist in Winnipeg public schools, has spent the past four years in Palestine.

So great is the demand for labor, arising from the steady stream of capital flowing into the land from Jews in Canada and the United States, that even students and members of leisured classes are asked to do manual labor, Miss Bere said.

Empire Trade

Dried apricots and peaches, raisins, sultanas, and canned fruits from British South Africa are now purchasable in OULAWA shops. And attention is being called to this in advertisements by the South African Government. Fine business says the Ottawa Journal.

Italy's appropriation for education this year is 70 per cent. more than in 1932.

POULTRY RAISER CONQUERS "ROUP"

Praises Minard's Liniment As Remedy For Roup or Bronchitis

Read in this letter from G. Minard, Port George, how he checked Roup (Bronchitis) when it broke out among his young fowls. "After trying other remedies and obtaining no results whatever," writes Mr. Minard, "I tried Minard's Liniment, five or six drops on the tongue and sometimes more, depending on the birds. I am now free from the disease and I am sure Minard's Liniment is a tried and proven remedy for Roup, Croup, Bronchitis, and all diseases, as well as for Bronchitis and Croup in Man. For Sale at all Drugstores."

Home Grown Vegetables

Need For a Good Garden For Every Family Is the Community

An excellent work is being carried out by the Extension Service of the Manitoba Department of Agriculture. Miss Esther Thompson, of the Women's Division, is directing an effort the object of which is to stimulate an interest in the home vegetable garden. The suggestions offered come at a time when everyone realizes the need for greater economy. Miss Thompson stresses the desirability of a good garden for every family in each community. In a circular sent out from her department, she says:

What can you do, individually or as an organization, to help the people in your community realize the importance of an abundant supply of home-grown vegetables as a means of providing economical health insurance? A good garden, supplemented with canning, drying and storing, will help to insure appetizing and nourishing meals during the whole year. Since this is the time for sowing, what is to be done must be done quickly. Many people have already planted the first seeds.

Following are some suggestions for your consideration:

1. Begin at home. Plan to have a good garden and to fill your own cellar.

2. Get in touch with your neighbors and friends and talk to them about growing more vegetables and filling their cellars for next winter.

3. In every community there are individual men and women who have excellent gardens and who produce a variety and an abundance of vegetables under almost all conditions. They have the knowledge which the inexperienced need, and they are always ready to share their ideas with others, and to give in the most generous way "a helping hand."

Think of those experienced gardeners and let them help you to promote this ideal.

4. Are there people in your community who may require assistance in procuring seed?

This is the case in many Manitoba homesteads last year. "We started the tomato plants in the house in the middle of March," she says. "We picked 800 lbs. of tomatoes. We had ripe ones every day for two months, and I canned 94 quarts."

"I have canned pickles, jams, meats, etc. I canned 500 quarts. I also have carrots, onions, cabbage and the standard potato stored in the cellar. We would not be without our garden for anything. The only canned goods we buy are fish and pineapple, which we cannot grow."

This homemaker has a cellar as well filled as that of her thrifty mother and grandmother. It holds food for the whole winter, yes, something for every day and every meal.

Vegetables supply certain very vital food substances which are a necessary part of our food. If we omit them, we undermine the growth of children and impair the health of adults. When included in the diet they build up vitality, thus increasing resistance to disease; they provide necessary nourishment for the blood, bones and teeth of the body, and are invaluable as a means of regulating body processes.

A Highly Priced Bible

The pocket Bible which was used by John Wesley, the founder of the Methodist Church, is carefully preserved in London, where it is perhaps the most highly prized possession of the Church. Formerly it travelled everywhere with the President of the Church.

The R.R. Madras City in February this year loaded 281,000 bushels of grain and was ready for sea in 8 hours and 40 minutes, setting a new record for the port of Vancouver.

New Method Of Skin Grafting

Dust Particles Of Skin On Open Wound Is Latest Plan

Research workers of the University of Cincinnati College of Medicine added a modification of the humble salt shaker to the implements of the surgeon.

It's used in skin-grafting, that delicate operation whereby skin is transplanted to restore burned or otherwise damaged tissue.

Not always successful, the method of grafting, now generally in use didn't satisfy the medical research men of the university here. Dr. Louis Herrman said. Sometimes the transplanted skin wouldn't grow. When it did, scars often showed.

Grafting a patch of skin ready for taking, they ground it and put it in a modified salt shaker and then sprinkled it over the exposed wound. Skin stuck fast and grew, spreading until the desired surface was covered with normal tissue.

"This," said Dr. Herrman, "is like sowing a seed instead of transplanting a tree."

It didn't seem to make any difference, he said, whether the particles of skin fell "right side" up or down, the skin grew just the same.

Before, he explained, it was customary to cut pieces of skin about the size of a postage stamp and fit them carefully over the damaged area. Even if the pieces stuck, scars often showed at the edges.

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile

—Without Calomel

You are "feeling lousy" simply because your liver isn't doing its creative, cleansing, purifying work. It's the liver that filters out the poisons from your blood, and it's the liver that keeps your system in a healthy condition. When your liver is sluggish, you feel depressed, tired, and listless. You have a headache, you have a bad taste in your mouth, you have a general feeling of uneasiness. This is the liver's way of telling you that it needs help. Take Carter's Little Liver Pills. Purify your blood, and you'll feel like a new man. Ask for them by name. Refuse substitutes. See at all drugstores.

Not Counted By Possessions

Abundance Of World's Goods Do Not Make One Rich

One of the richest men in the world died in London the other day. He wasn't at all famous, and he only left \$400 in actual cash. But he was one of the world's richest men, just the same — and if you don't believe it, look at the final paragraph of his will. It read: "I have had a wonderfully happy time and I thank God for a house of life," and a little earlier in the will occurred this sentence: "I can only wish that I had been more worthy of the affection lavished upon me from birth by my mother, father, uncles, relatives and later by my very dear wife, my children and my friends." — Calgary Albertan.

SIMPLY WORN OUT?

Take Lydia E. Pinkham's Vegetable Compound

Can anything be more wearing for women than the constant round of household duties? You have no time to be sick — you are tired, ailing, aching, and you feel as if you just cannot stop. There comes a time when something must be done, and you find yourself simply worn out.

Take Lydia E. Pinkham's Vegetable Compound will help you. Its tonic action will build up your system, and make your daily tasks seem easier to do. 18 out of every 100 women who report to us say that they are benefited by this medicine. Buy a bottle from your druggist today — and watch the results.

CHAPTER VIII.—Continued.

Presently Haskell turned around, smiling pleasantly. "I was disgruntled about something when you first came in, corporal. You really have patrolled hard for several months. I'm sorry I snapped at you. You can have your three days off whenever you like. You want to start tomorrow?" And when Bill nodded eagerly: "Very well, I'll throw in the rest of this evening too. By the way, when you go past barracks ask Whipple to step down here."

"Snakes!" Bill breathed to himself, as he thanked Haskell and went out the door. "That Spring-hee Johnny must be winding up to ask a favor of me, or something. But I've got my three days to help Alan out. Lord, I hope Alan shows up during my free time. He might maybe let me go along on his trick."

With no suspicion of the ugly truth, he turned up the twilight slope. When Whipple came in, Haskell ordered him to close the door and pull down the window, to guard against possible eavesdropping. Then he tersely explained the situation. He added:

"Hardskew will probably steal some more gasoline and oil tonight. What he's already stolen isn't enough for a 'plane to do much maneuvering on. I want you to watch him stealing that stuff so that you can later be a witness. He'll probably have time to take those drums only a couple miles from here tonight. Tomorrow he'll take all of it on to the place where he's to meet Baker. He's been sneaking it away little by little when he had the chance, and hiding it close by; but during his three days he'll take it to the meeting place."

You go down to the river bank now to those two tpees and get that Indian called Ogi-Tomax. You remem-

ber Hardskew thrashed him one time last winter for carrying a squaw-club and beating his wife. He's got a personal interest in this, he's just the man we want. Take a carton of my cigarettes with you and a little rum as a silence present. I'll personally pay him five dollars a day. Do you understand so far?"

Whipple nodded. Haskell went on: "You and the Indian are to shadow Hardskew tonight and tomorrow. Find out where he's taking that stuff and where he's going to meet Baker. As soon as you do that, whip back here and report to me."

It was late the next evening before Whipple returned. He came back tired, bedraggled, but with electric news.

He and the Indian had watched Bill steal more gas and oil from the stores. They had shadowed him to the temporary cache two miles up the Mackenzie. There he had loaded his canoe to the gunwales with the drums and cans and had taken them all to a big lake twenty miles on up the river.

He had cached the fuel on a headland called Goose Point; and was waiting there without the faintest suspicion that he had been trailed and was being watched. The Indian, lying low like a wolf in the willows, was keeping an eye on him.

As Haskell listened to the report, he forgot the haggard day and night just passed. He had scarcely dared hope for such news as this.

After careful thought, gleaning against any slip-up, he ordered Whipple: "Go get your rifle and belt-gun. I'll take mine, too. We'll go up there in the launch. You can drive it. We'll capture Hardskew and those supplies. That'll be that. Then we'll wait there. The 'plane'll be alone in a couple days. We'll keep the launch in cover close by. When the machine lights down and the 'go ashore to get the supplies, we'll ram it and put it out of commission. Then we'll have Baker and his Feathered and we'll put them where the dogs won't bite 'em!"

After his despair of their last week, after his helpless festering anger at Baker, it was a new lease on hope to know he was going to smash Baker's venture and throw him into prison and make his marriage to Elizabeth impossible! Baker was walking all unknowingly into a deadly trap. Walking into arrest and criminal disgrace and prison. He would be lucky to get off with a sentence of two years! That was the statute minimum for his offense.

Buckling on his belt-gun, Haskell

snuffed the candles and went out of his cabin on the easiest, most exultant, most deadly certain trip he had ever made.

CHAPTER IX.

Wings Over the Wilderness

On that first day of flight, as dawn broke full and the sun chased away a layer of gossamer clouds beneath the White Speedair, Alan looked down with marveling eyes at a strange panorama. Evergreen forestry, silvery lakes and silvery network of rivers far below, swam past at a speed to amaze him. In thirty minutes he was covering a distance which would take a whole day's hard travelling by canoe or komatik.

Knowing that if he and Buzzard showed up at a police post or larger trading center, it would mean a quick and sorry end of their flight, Alan planned to avoid such places religiously. He had a conviction that he and Buzzard were "wanted." They had left too many tracks in Edmonton—clews that would speedily be followed up. The police there, a wise live outfit, had certainly connected them with the theft of all that government property and had radious instructions for their arrest.

Eventually he and Buzzard were going to be caught. It was as inevitable as sunset. Even if he and Buzzard had to return to civilization and face the music. To Alan the worst of it was that Buzzard was going to pay a heavy price for helping him on this thankless job. For himself he did not greatly care; he hardly thought of it. . . . He was headed north again, on his last patrol, his greatest patrol.

As they worked on north, they made moderately good time, but only by incessant care and worry. Engine trouble caused them delay. Again and again they sat down on some unknown river or lake and sweated for hours over the old motor. Fuel was a constant problem. Avoiding Mounted detachments and Royal Signal corps stations like the plague, they dared stop only at wilderness-buried posts where radios were unlikely and no police handy. They could never be certain of getting fuel, and that they did get was usually half kerosene.

Alan was looking forward to his rendezvous with Bill as the end of all this worry about gas and oil. Besides the fuel there at Goose Point, Bill had promised to cache some supplies up the Aloska near Joyce's home.

Alan was feverently looking ahead to meeting Bill at En Traverse lake, to getting those precious supplies, to seeing Joyce again there on the Big Aloska. All of his loyalty to the sister of his dead partner could not keep him from seeing Joyce's vital spirited personality with Elizabeth's idle deliberate dependence. On their last evening, worn out by a day of engine trouble and head winds and blinding rains, they alighted in a little spruce-buried lake on Silverpit River, a short hundred miles south of Fort Endurance. Anchoring the 'plane, they paddled ashore, cooked a warm meal, and rolled up in their blankets for a few hours of desperately needed rest.

"Tomorrow's the day of days," Buzzard remarked, thinking of the supplies and a base to maneuver from.

"It's the day of days," Alan agreed, but he was thinking of Joyce running down the path, bareheaded in the sun, to greet them. Tomorrow he would know if she was safe. Tomorrow, after the rendezvous with Bill, the White Speedair would be dropping down upon the Big Aloska.

Buzzard was asleep almost instantly, but Alan, tossing in a useless attempt to sleep, finally got up, built a tiny fire, and sat beside it, thinking, a dead pine in his teeth.

As he sat there under the solemn spruces, he tried to look steadily at his booming marriage to Elizabeth, and decide his course. No longer blinded by idealization of her as a girl, he saw now, with pitiless insight, that all along she had not wanted him unless he had a good income and was out of the North. She might love him as well as she had ever loved anybody; but to her he was not greatly more than a means of getting what she wanted out of life.

The prospect of marrying her when his respect was gone, made Alan wince. And his respect was gone with a vengeance. Those moments in the cabin, when she offered herself to him, had been a shock and revelation. She had acted not out of excusable passion, not out of love, but as a guarantee that he would take that Victoria job. He thought of the incident with something of revulsion.

Now he was groping to see the honest and righteous thing for him to do. He wondered whether it would be courage or a weak yielding to desire for him to break with Elizabeth and sweep aside the obligations binding him. There was right on both sides. Elizabeth was waiting for him; he had promised to marry her and take her out; he had burned his bridges and committed himself to that Victoria job. Yet it was wrong to enter a loveless marriage that would bring tragic unhappiness. It was wrong to marry Elizabeth when his whole-hearted respect and love went out to Joyce MacMillan.

In the lonely anguish of his thoughts he laid his decision more and more in the hands of time. He felt he must see Joyce again before he could take a decisive step. If he did capture those six criminals and so cleared her father, she would be grateful with all her heart. He meant to tell her about the tragic happening which had bound him to Elizabeth. If he could win back that old intimate comradeship with her and she could begin anew, then the rightest thing was to put Joyce's happiness above Elizabeth's.

(To Be Continued.)

Unemployed Turn To Placer Mining

Seven Thousand Men Are Combining Placer Areas In British Columbia

One of the highlights of the British Columbia gold industry during 1932 was the active search that was made for placer gold, according to the Dominion Department of Mines, Ottawa. From the number of free miners' certificates issued, it is estimated that some 7,000 men, formerly unemployed, participated in this search. These men, it is estimated, have scattered throughout the old placer areas, in the hope of making wages with the "Gold pan" and "rocker." Experienced prospectors have been literally combing the placer areas, particular attention being given to the search for old pre-glacial and inter-glacial drainage channels. Reports of new discoveries of coarse gold, found underlying false bed rock are quite common in the old camps, such as the Caribou, Omineca, and other areas.

An inter-island air service has just been inaugurated in the Philippines.

WHOLE FAMILY WITH INDIGESTION

A mother of four writes:—"Myself and family of four all seemed to suffer from acidity, pains in the back, and other forms of indigestion. I suffered whatever I ate. But since we have been taking Kruschen (for the last three months) we can eat anything, and all enjoy our food much better. We never have a trace of acidity or pain now. I think it is wonderful—it has no upsetting results. Whatever we may have to go without, we could not give up Kruschen."—(Mrs.) M.K. Kruschen Salts swiftly neutralises acid, takes all the torment out of it, and gently expels it from the system. And by stimulating your organs of elimination to perfect regular action, Kruschen will prevent this harmful acid from ever accumulating again. After that you'll experience no more misery after meals. Kruschen will keep your inside clean and serene. Pure and invigorated blood will be sent courting to every part of your body. You'll feel wonderfully energetic and well. As healthy and hearty as it is humanly possible to feel.

Little Helps For This Week

"Wait on the Lord, he of good courage and He shall strengthen thy heart, wait I say on the Lord."—Psalm 27: 14.

"He giveth power to the faint, and to them that have no might He increaseth strength."—Isaiah 40:29.

"Should we feel at times disheartened and discouraged, a comforting thought, a simple movement of heart towards God will renew our powers. Whatever He may demand of us He will give us at the moment the strength and the courage that we need."—Fenelon.

We require a certain firmness in all circumstances of life, even the happiest, and perhaps contradictions come in order to prove and exercise this. If we can only determine so to use them, the very effort brings back tranquility to the soul, which always enjoys having exercised its strength in conformity to duty. Wm. van Humboldt.

The Easiest Way

The Fort William Times-Journal says one of the reasons why the world is so loaded down with debt is that it is so much easier to seek for new forms of taxation than to study new economies. Governments have much the same mentality as the fellow who gave a note in settlement of an account and then murmured, "Thank God that's paid."

Old Lady (to policeman): "I've lost my canary. Would you mind notifying the flying squad?"

FOR ANY PAIN

Have you ever found any
quicker relief than this?

Anyone can take Aspirin, for doctors have declared these tablets perfectly safe.

And there is no quicker form of relief for any pain.

It is well to remember these things when anyone tries to persuade you to try anything in place of these tablets.

Aspirin may be taken as often as there is any need of its comfort: to stop a headache, throw off a cold, drive away the pains from neuralgia, neuro-

tis, rheumatism, lumbago, etc.

Whenever you take Aspirin you know you are going to get immediate results—and you know there will be no ill effects. You know what you are taking.

Why take chances on some form of relief which may not be as swift—may not be as safe? The new reduced price on bottles of 100 tablets has removed the last reason for ever experimenting with any substitute for Aspirin.

Aspirin is a trade-mark registered in Canada.

Was So Short of Breath Could Not Lie Down to Sleep

Mrs. P. J. Chernoff, Shoreacres, R.C., writes:—

"I had been so troubled with shortness of breath I could not lie down to sleep.

I couldn't do any hard work, or climb the stairs, and had nervous and smothering feelings, and became very weak.

I tried all kinds of medicine, but could get no relief until after I had taken three boxes of Milburn's Heart and Nerve Pills, and since then I have felt better in every way."

KNOX UNITED CHURCH NOTES

The Presbytery of Red Deer will meet at the Knox United Church, Didsbury today (Thursday) at 2:30 p.m., to which the following delegates have been appointed, Messrs. Austin, Chambers and McGhee. Important business pertaining to the local church will be up for consideration. The members of the presbytery will afterwards be entertained by Mr. and Mrs. Wallace.

At the service on Sunday next, May 7th the minister will preach the concluding sermon of the "Sermon on the Mount" series. All are invited to attend.

Preparations are in hand for the Mothers' Day service on Sunday May 14th at 11 a.m. and 7:30 p.m. In the morning a special program, having for its theme, "Happy Children in Happy Homes," will be rendered. At the evening service the thought of the day will be emphasized and the sermon subject will be, "A Mother's Request for Her Sons." All are heartily invited to both services on Mothers' Day.

Westcott Notes.

Westcott W.I. met with Mrs. C. Ray on April 27th. Fifteen ladies were present, and the subject of "Legislation" was ably taken up by Mrs. E. Owens. She spoke of the domestic rights of married women, also the old age pension. A brief discussion followed each of these topics. Questions re members of the provincial legislature were asked. Resolutions which will be dealt with at the convention in May were read and voted on. A short paper on the "League of Nations" was given by Mrs. J. Robertson, touching on the oriental problems. A piano solo by Mrs. F. Dexter and a flower contest prepared by the hostess concluded the meeting. The May meeting will be held at the home of Mrs. Owens, Sr.

Mountain View Notes

The monthly meeting of Mountain View W.I. took place at the home of Mrs. Thos. Finley. The topic for the afternoon was ably given by Mrs. Max Woods. Mrs. Harry Pearson was elected delegate to the W.I. conference to be held in Calgary during May.

Mrs. R. Oldham entertained the Five-Hundred Club on Saturday evening. Four tables were played and prizes went to Mrs. Blain and Mr. Finley. Consolations were won by Miss H. Oldham and Mr. Ed. Barnes. The club disbanded until next fall, as springtime operations allow no leisure time.

Melvin Notes

Mrs. Willows, of Dornale, Alberta spent last week with Miss Florence O'Brien.

Mrs. Roscoe Irwin entertained a number of ladies Thursday afternoon last.

Mrs. Glen Johnston and baby daughter returned from the Didsbury Hospital on Monday.

Miss Florence O'Brien, Mrs. Willows and Mrs. C. Reinhardt visited Calgary on Saturday.

Mr. Axel Nielson and his bride spent a few days last week at his home here, when a few of the neighbors called on them.

Mrs. James Johnston, who has been spending a week with Mr. and Mrs. Peter Johnston, went to the Calgary General Hospital for a minor operation.

The district received word last week of the death of Salem, Oregon, of Mr. Charles Fessenden, a pioneer of this district. He moved to Salem some years ago.

A very pleasant evening was spent last Wednesday at the home of Mr. Roy McNaughton, when the neighbors gathered to welcome his bride to the district.

WEEKLY SERMONETTE

"When things go wrong, be calm, be strong—troubles never last long."

LOCAL & GENERAL

A large number of local masons visited Mountain View Lodge at Olds on Monday evening.

Mr. Jim Blain, of Brandon, Man. is visiting his brother-in-law, Dr. Clarke. Mr. Blain is also an old friend of Mr. F. W. Leeson.

The sermon subject at Zion Evangelical Church next Sunday morning will be, "The Necessity of Faith," and in the evening, "The Plagues of Egypt."

Clint Reiber didn't lose his shirt, he won it and was declared as Didsbury's champion bridge player in the tournament that finished last week.

Mr. Reuben Rodney made the lucky guess in the Congoium hidden number contest at the Builders Hardware last week. His guess was 1575 and the hidden number was 1561. Mrs. Shiels was next nearest, her guess being 1582.

Mr. and Mrs. W. O. Highland, of Calgary, announce the engagement of their daughter, Kathleen Dorothy to Mr. Frank A. Farrow, the marriage to take place this month. Miss Highland is the niece of Mr. and Mrs. Erven Rodney.

What is this thing called love, and why do they call it fate? The intimate diary of a penthouse play girl. Denied love she declared war on morals, and an open season on other women's husbands! Loretta Young in "They Call it Love," at the Opera House next Monday and Thursday.

Mr. Wm. D. Lowden, special representative of the Tip-Top Tailors who was at Ranton's on Monday, says that signs of a return to better business conditions are always welcome. One of the recent reported good tidings is from Tip-Top Tailors Ltd., who had the best Easter season's business in the history of the organization.

There were over 200 people present at the drawing for the lucky number at Berscht's store Saturday afternoon last, when the holders of the lucky tickets were: 1st Mrs. W. H. Snyder, 2nd Mrs. W. White, 3rd Mrs. Cliff Mortimer. At the drawing on Monday the lucky winner was Mrs. J. Morgan, of Harmanston.

THE LONE PINE W.I.

The old church bell has long been cracked, its call is but a groan. It seemed to sound a funeral knell with every broken tone.

We need a bell for the brethren said, but taxes now high we can spare, so let's ask the W.I.

The shingles on the roof are old, the rain comes down in rills. The brethren slowly shook their heads and spoke of monthly bills. The chairman of the board arose and heaved a heavy sigh. "We'll have to lay the case," he said, "before the W.I."

The carpet had been patched and patched till quite beyond repair. And thro' the aisles and on the steps the boards show hard and bare.

It is too bad, the people said, an effort we must try. To raise an interest on the part of the Lone Pine W.I.

The Premier's wages were behind, the poor man blushed to meet. The butcher and the grocer as they passed him on the street. But nobly spoke the M.P. then, and straightened out his tie. "We'll call upon the treasurer of the Lone Pine W.I."

Ah, said the men, the way to heaven is long and hard and steep. With slopes of ease on either side the path is hard to keep. We cannot climb the heights alone, our hearts are sore, and I know that we need shall get to heaven without the W.I. Compliments of Mrs. Norman Bowles.
